

	Standard	Long Barrel
Item Number	BT-36051	BT-36053
Caliber	.223 Rem. (5.56 x 45 mm)	.223 Rem. (5.56 x 45 mm)
Operation	Short stroke gas piston rotating bolt	Short stroke gas piston rotating bolt
Magazines	M16/AR15 type, two 30 round magazines included	M16/AR15 type, two 30 round magazines included
Barrel Length	310 mm	400 mm
Weight Empty	3.57 kg	3.72 kg
Length Open	81.9 cm	90.9 cm
Length Folded	61.2 cm	70.2 cm
Stock Pull	34.5 cm	34.5 cm
Modes of Fire	Semi automatic only	Semi automatic only
Trigger Pull	1.980 kg	1.980 kg
Twist	1 in 7"	1 in 7"

Accessories

The APC223 comes complete with an interchangeable 1 or 2 point carrying sling, two 30 round polymer magazines, removable open sights, a cleaning kit, an instruction manual and a polymer carrying case.

1. Stocks – There are different types of stocks available. They can be used to adjust the carbine perfectly to the needs of any sized shooter or shooting style.

2. Quick Detachable Vertical Foregrips – Provides the shooter a stable shooting grip and keeps the support hand away from the muzzle. There are several versions with an extractable bipod available.

3. Brass Catcher – The B&T designed brass catcher mounts directly on the right side Picatinny Rail. It pivots easily and quickly for manipulations and safety inspections. On the range a brass catcher makes cleaning up quick and easy.

4. Mounts for scopes and red dot sights – Our NAR 45° Mount is especially useful if a red dot sight should be mounted next to a scope.

5. Bipods – In order to achieve maximum accuracy, B&T offers a variety of foldable telescopic bipods, which could be hinged down when necessary.

APC223 – ADVANCED PRACTICAL CARBINE

Originally designed to meet the current needs of Police and Military forces worldwide. It has also been fine-tuned for the desires of today's sport shooters. The APC223 is a rugged but lightweight carbine in .223 Rem., perfect for action shooting disciplines like IPSC as well as target shooting, plinking and hunting.

APC223 – Advanced Practical Carbine .223 Rem.

Additional Red Dot Scope

The B&T NAR 45° Mount allows mounting an Aimpoint® Micro next to the primary sighting scope, enabling the shooter to engage close targets fast and accurate (optional accessory).

Hydraulic Buffer (Inside)

This feature does much to reduce felt recoil, improve accuracy for follow up shots, eliminates bolt bounce, protects optics and reduces wear and tear on the receiver.

Scopes and Mounts

A scope with a 1 to 6 magnification like the Kahles® K16i solidly mounted with a B&T mount is perfect for fast and accurate target acquisition and engagement at distances up to 300 Meters (optional accessories).

Reversible Charging Handle

Fully ambidextrous to accommodate any shooter, regardless of previous training.

Integrated Picatinny Rail

The Picatinny Rail (aka NATO Accessory Rail) is machined and integrated into the upper receiver as well as the handguard, resulting in perfect alignment for outstanding accuracy.

Muzzle Compensator

The specially designed compensator reduces the already low recoil of the APC223, allowing for fast follow up shots.

Barrel

The hammer forged barrel is designed for optimal transitional ballistics and long barrel life. This 1 in 7" twist rate is the best all-around for many different loads and bullet weights.

Lateral Accessory Rails

Picatinny Rails mounted on both sides for use with any accessories. Comes with rubber inlays for enhanced gripping.

Lower Accessory Rail

Picatinny Rail for mounting an optional vertical foregrip to enhance handling and ergonomics.

Quick Detachable Vertical Foregrip

The Quick Detachable Vertical Foregrip provides a stable grip for the forearm, the built in quickly extractable bipod is perfect for longer distance prone shooting (optional accessory).

Aluminium Upper Receiver

Produced from an extruded aluminium sheath of special aerospace alloy, that will provide the user with many years of reliable service.

Reliable Magazines

Accepts standard NATO STANAG (M16/M4 type) magazines, the APC223 is delivered with two 30-round state-of-the-art polymer magazines.

Trigger

The two stage trigger provides a very crisp reset for quick follow up shots.

Ambidextrous Bolt Release

Enables any operator to perform a reload in a safe and rapid manner.

Ambidextrous Magazine Catch

Fully ambidextrous to accommodate any shooter, regardless of previous training.

Pistol Grip

Perfect angle for fast target acquisition of any size hands. It is complete with an integrated storage compartment for lens caps, cleaning kit or spare batteries.

Ambidextrous Safety / Fire Selector

The "European Style" rotating lever 2-position ambidextrous safety provides the user easy tactile selection of safe and fire mode.

Folding Stock

The positive lock folding stock can be quickly deployed in one swift motion, reducing the length of the APC by 280mm. It can be extracted by 60 mm. A clamp on cheek piece gives 12 mm extra height if need due to special scope mounts (optional accessories).

The APC223 produces excellent accuracy. The precision from a supported position can put all the rounds of a five-round test group into the 9 ring circle at 100 meters. That is a group of about 28 mm (1.1 Inch) and is more than sufficient for any normal dynamic competition. As a matter of fact it is better than many other .223 weapons in the same category.
