

Welcome to

DEAD AIR

turn up the silence.™

DEAD AIR ARMAMENT™ IS ALL ABOUT BRINGING THE BEST MATERIALS,
THE BEST DESIGNERS, AND THE BEST MANUFACTURING TECHNIQUES
TO THE SUPPRESSOR MARKET. BECAUSE IT NEEDS IT.

DEAD AIR
a r m a m e n t

To all of our customers we thank you for supporting us and for standing up for your Second Amendment rights as Americans.

DEAD AIR ARMAMENT™ IS NEW, AND BETTER.

It was founded by Mike Pappas, and if that name rings a bell, it's because Mike co-founded another silencer company back in 2008. Among others, Mike is also teamed up with silencer designer Todd Magee. Mike and Todd have set out to build the best suppressors on the market. There is no substitute for experience.

IT'S IN THE DESIGN.

Look at any Dead Air Armament™ product and you'll see attention to detail and aesthetic choices driven solely by engineering performance. No gimmicks or short cuts - just pure performance.

As Mike puts it: "I'm finally building the no compromise suppressors that I've always wanted to make. No corporate bottom lines. The only thing that matters to me is how it sounds. And the Sandman™ sounds awesome..."

IT'S IN THE MATERIALS.

There is no substitute for materials and no shortcuts with Dead Air. For example, every Sandman™ baffle is 100% Stellite®. They cost three times more than stainless steel and they work better than Inconel® under the hardest use and conditions. As for the tubes, we could have used the material that most of our competitors use, but instead we went with high-performance precipitation hardened stainless steel because lightweight strength does not come cheap. Only with the Sandman-Ti™ do we forgo the use of high-performance stainless steel and that's because we use Grade #9 titanium. Why do we do it? Because our precision rifle direct thread suppressor is designed for professional law enforcement applications. The old adage "close only counts in horse shoes and hand grenades" could not be truer when a professional has to make an accurate shot in difficult conditions. Law enforcement equipment must perform and Dead Air hits the mark.

IT'S IN THE MANUFACTURING.

Design and materials are part of the equation, but there is no substitute for thirty years of manufacturing excellence and that's what BPI® brings to the product. Every Dead Air suppressor is manufactured in Lawrenceville, Georgia by highly trained Americans intent on manufacturing the best suppressor on the market. Our standards are simple, "good isn't good enough" and if a product comes off the line not up to par, then the can gets canned. It's that simple.

“I’M FINALLY BUILDING THE NO COMPROMISE
SUPPRESSORS THAT I’VE ALWAYS WANTED TO
MAKE. NO CORPORATE BOTTOM LINES. THE ONLY
THING THAT MATTERS TO ME IS HOW IT SOUNDS;
AND THE SANDMAN™ SOUNDS AWESOME.”

Mike Pappas
Director of Product Development

EXECUTIVE BIOS

MIKE PAPPAS

Director of Product Development

An industry icon who, in 2008, was one of the original founders of another silencer company. Among other things, Mike significantly contributed to some of the industry’s most innovative designs and really put his former company on the map. Mike is noted for his industry contacts and commitment to customer service. In sum, he is one of the best guys in the suppressor market and a key component to the design and management of Dead Air Armament”.

TODD MAGEE

Director of Product Engineering

An engineer by degree specializing in suppressor design since 2008. Todd got his start making his own cans which he then demonstrated to considerable fanfare on YouTube®. This led to Todd’s eventual hiring at another suppressor company where he pioneered and perfected monolithic baffle designs for his former company. Todd has taken that experience with him to Dead Air, where he now oversees the Research and Development Department.

ERIC ROGERS

President

A pro firearms industry attorney with substantial regulatory and litigation experience. His former clients include Blackwater USA® and Heckler & Koch® to name a few. Eric is the President and one of the founders of Sound Moderation Technologies”, the parent company of Dead Air Armament”.

TODD SAIED

Senior Partner

Todd Holds a Bachelor of Science degree in Civil Engineering and has 25 years of experience providing successful leadership for dynamic business models. He is responsible for implementing the organizations vision mission and overall business strategy with the support of Senior management.

PRODUCT LINE-UP

THE NEXT BEST THING IN SUPPRESSOR DESIGN, THE WAIT IS FINALLY OVER.

Our introductory product offering delivers superiority in the most popular suppressed calibers on the market. Starting with the 7.62 Sandman-S™, Sandman-L™, and Sandman-Ti™, and shortly followed by .22LR and centerfire pistol silencers. With this line-up, Dead-Air will be your first option when outfitting for silence.

| | 7.62MM | | 300 BLK | | 5.56MM | |
|--------------|----------|-----------|----------|-----------|----------|-----------|
| | Measured | Reduction | Measured | Reduction | Measured | Reduction |
| UNSUPPRESSED | 167 | N/A | 160 | N/A | 165 | N/A |
| SANDMAN-S™ | 140 | - 27 | 129 | - 31 | 136 | - 29 |
| SANDMAN-L™ | 136 | - 31 | 124 | - 36 | 133 | - 32 |
| SANDMAN-TI™ | 136 | - 31 | 124 | - 36 | 133 | - 32 |

TEST EQUIPMENT

GRAS ¼" Pressure microphone Type 40BD // GRAS 1/4" CCP Preamplifier Type 26CB // National Instruments
NI USB-4432 - DAQ 102.4 kS/s, 24 Bits, ± 40 V, IEPE // National Instruments - LabVIEW software

7.62 SANDMAN-S™

- LENGTH: 6.8"
- WEIGHT: 17.3oz.
- DIAMETER: 1.5"
- RATING*: Up to .300 Win Mag
- FINISH: Cerakote body, Nitrided Muzzle Device

The "S" is for short. And that's what it is at 6.8 inches in length with a weight of 17.3 oz. The Sandman-S™ delivers performance in a small package.

“THE PERFECT CROSS-OVER CAN FOR YOUR 5.56MM, 300BLK, AND 7.62 PLATFORMS”

The QD system is design perfection. It features easy one hand removal in just seconds without the wobble or seizing that can often times affect performance. Easy-on-easy-off with minimal point of impact shift or loss of precision. The baffles are manufactured from Stellite® and welded into a solid core for added strength and durability. The tube and mount are manufactured from precipitation hardened and heat treated stainless steels.

As an innovative 7.62 design first, the front cap is detachable and features an integrated flash hider. This affords better performance, particularly in low light conditions. The detachable front cap also provides some level of insurance when that "accident at the range" happens and the can gets dropped or abused. The front cap can be replaced trouble free without the need of sending it back for time consuming repairs. The Sandman-S™ features a lifetime warranty.

7.62 SANDMAN-L™

| | |
|-----------|---------------------------------------|
| LENGTH: | 8.9" |
| WEIGHT: | 21.8oz. |
| DIAMETER: | 1.5" |
| RATING*: | Up to .300 Win Mag |
| FINISH: | Cerakote body, Nitrided Muzzle Device |

For those demanding absolute performance in a suppressor the "L", or long version, delivers. Made and constructed from the materials used in the "S" version, the "L" is only 8.9 inches in length, but offers a true sound reduction of 31dB firing standard 7.62 ammunition.*

In short, it is the best performing and quietest 7.62 suppressor on the market. Just like the "S", the long version uses our industry best QD system for fool-proof quick one handed mounting. No seizing and minimal point of impact shifts with this design. The mount features Nitride® finished 17-4 stainless steel construction for the ultimate in durability.

The Stellite® baffles form a solid welded core with a detachable front cap featuring an integrated flash hider. The whole suppressor gets a Cerakote® finish for ultimate corrosion protection as well. For a tactical bolt rifle or a .308 AR there isn't a better can in the Sandman -L™ class. As always it's backed by our no questions lifetime warranty.

Easy on, easy off. The 7.62 Sandman-L™ and Sandman-S™ attach with quickness and confidence to our BAM Brake, which will easily become your favorite muzzle device whether you've got your suppressor mounted or not.

SANDMAN-TI™

| | |
|-----------|--------------------|
| LENGTH: | 8.2" |
| WEIGHT: | 16.8oz. |
| DIAMETER: | 1.5" |
| RATING*: | Up to .300 Win Mag |
| FINISH: | Cerakote body |

“FOR THOSE DEMANDING
ULTIMATE SILENCE FROM A
PRECISION RIFLE...”

The Sandman-Ti™ is your huckleberry. It features a direct thread attachment and a titanium tube. The Ti has the same class leading solid weld Stellite® baffle core and detachable front cap. The exterior is finished in Cerakote® for ultimate durability and like all of our products is backed by a lifetime warranty.

THE MASK-22™

HEAVY DUTY

| | |
|------------|------------------------------|
| LENGTH: | 5.25" |
| WEIGHT: | 6.3 oz. |
| DIAMETER: | 1.070" |
| RATING*: | .22LR up to 5.7x28 |
| FINISH: | Cerakote body |
| MATERIALS: | Titanium and stainless steel |

Our .22 suppressor features a blend of titanium and 17-4 PH stainless steel construction for direct thread applications. What sets the Mask apart is its marvelous performance and the ease with which it can be disassembled. It provides balance of performance, weight, and extraordinary cleaning intervals that are unmatched by the competition. This isn't a "me too" compulsory foray into the .22 suppressor market. No, we wanted the best and we delivered. The Cerakoted finish will provide years of protection against one of the dirtiest rounds known to man, the ".22lr". It's backed by our no questions asked lifetime warranty and will provide years of fun and enjoyment.

**Final specs may change upon production.*

TO GUARANTEE QUALITY AND YOUR ENJOYMENT FOR YEARS TO COME, ALL DEAD AIR PRODUCTS ARE BACKED BY OUR NO QUESTIONS ASKED LIFETIME WARRANTY.
